PARFLEX PRIVACY SCREEN SYSTEMS Wall Mounted Options

Parflex privacy screens can be moun to a wall with three different way.

In our basic models you can mount our screens directly to the wall with help of an installation profile.

Also with the help of our accessories you can mount them with a space to a wall or you can mount them to a hospital wall mounting rail.

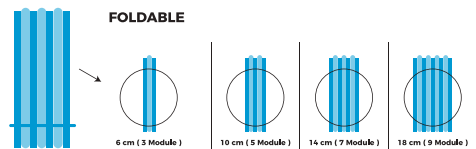

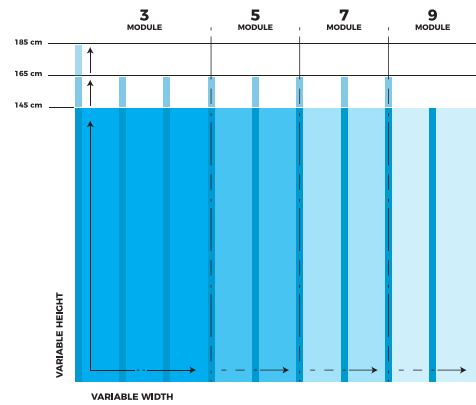

We have several accessorie option for different type of mounting.

Our standard screen lenghts are between 90cm to 270cm.

Each panel has 30 widthy.

On the other hand our standard screen heights are 145cm, 165cm and 185cm. Their standard caster gap between ground and bottom side of the panel is 25cm. Parflex privacy screens can be easily mount and dismount to wall. They have more then 250 colour options and also if you wish we can print your pictures on their panels too.

MODULE VARIANTS

PARFLEX PRIVACY SCREEN SYSTEMS Mobile Screen Options

Parflex privacy screens also can be used as mobile. Instead of mounting them on a wall, you can mount them on a HM serie or HMC serie mobile stand.

With this way your screen becomes totally mobile. You can move it anywhere you want and use it there efficiently. When you fold your screen it's panels also will be fold inside the mobile stand and use less area. Like all Parflex Privacy Screen Systems, all the mobile stand versions are made from antibacterial and stainless materials. Also according to your choice there are options for Mobile Stands to connect from one to three pcs of screen.

PARFLEX PRIVACY SCREEN SYSTEMS - Bed-End Screen Options

These screens are specially designed for used on the end of the beds. They are totally mobile and their panel width is 50cm. In this design one panel on this screen is fixed to its mobile stand and the rest of the panels can be foldable on it. The screen cannot be removed from mobile stand. Also in this design the standard caster gap between ground and bottom side of the panel is 15cm. Our Bed-End screens have two standard heights they are 155cm and 185cm. Their standard lengths are 150cm and 250cm. Like all other Parflex Privacy Screens they are produced by same antibacterial and stainless materials. They have more than 250 colour options and also if you wish we can print your pictures on their panels too.

LEAD SHIELDED VERSION

As a version of Bed-End screens, according to usage area we can produce 1 or 2 mm lead shielded screens. If the user wants we can also add a lead shielded operator window too. With this product according to usage area x-ray operators in hospitals can be protected from the effects of x-ray machines.

PARFLEX PRIVACY SCREEN SYSTEMS Fixed and Portable Options

These two accessories just basically works like HM Series. Instead of mounting our screens on a wall, you can mount them on a AP serie or PM serie . AP serie has a 15x15cm square base which can be fixed on the floor with screws. When you have no wall options for a mounting, you can fix an AP serie on floor and you have a ground mounted screen anywhere you want. Just like the HM series we use antibacterial and stainless materials.

Also according to your choice there are options for AP Series to connect more then one screen in same time.

PM serie has a 45x45cm square base which is portable which gives you a kind of mobility. If you are not gonna be keep change your screens location, you can choice a PM serie instead of a HM or HMC serie. The base of PM serie works like a portable weight base. So you can carry it wherever you want and use your screen there. Like the all other series PM serie is also produced by antibacterial and steinless material and ofcourse like all the other series you have different options to mount more then one screens.

PARFLEX PRIVACY SCREEN SYSTEMS

Hybrid Screen Options

As Parflex family we always try to create alternative solutions to our customers problems. Hybrid Screens are basically mixation of our standard screens. According to our Customer needs we can begin with 50cm width panels in our screen then turn them to 30cm width panels in same screen. Or we can produce a wall mounted screen from 50cm width panels. We can use transparent or translucent parts.

We can produces our screens with panel heights or we can produce them with different screen lengths then our standard lengths. We can be flexible according to our Customer needs.

PARFLEX PRIVACY SCREEN SYSTEMS PARFLEX LITE SERIES

Let us introduce you to our new product, the parflex lite series. In this new series, we are here with a more innovative design beyond the standard.

Parflex Lite series consists of panels prepared by placing a special laminated Kraft body on an aluminum frame, just like our standard screens. There are Mobile and Wall-mounted options.

The differences from our standard screens are:

Reducing the panel thickness to 1 cm and making the product lighter
No plastic used in panel frames, all aluminum

Creating a longer-lasting, more durable screen by using aluminum threads instead of silicone joints at panel joints.
